

Polystry Technology Elastomer at Work

Specialising in Liquid Silicone Rubber ("LSR")

and leveraging over 20 years extensive experience in contract manufacturing, Polystry Technology has been supplying LSR, elastomer and plastic engineering components to healthcare, automotive, consumer and other industries.

Product design and development

Early supplier involvement is essential to the overall manufacturing success of new products, including reduced cost and faster time-to-market. Drawing from deep experience in project management and engineering expertise, Polystry delivers for its customers.
